Technical Skills

Languages: TypeScript, JavaScript, HTML, CSS, Java, C#, Python, Swift
Frameworks/Libraries: Vue 2/3, Nuxt, Astro, .NET , SwiftUI, Bootstrap, Tailwind, Axios, Express.js, asyncio
Tools: Git, Azure DevOps, VS Code, Visual Studio, Xcode, Eclipse, Firebase, Supabase, Postman, Figma, Ollama

Experience

Software Engineer (Intern) | *TypeScript, SCSS, C#, Vue 2, .NET, Bootstrap* May. 2025 – Aug. 2025
Oliver's Labels *North York, ON*

- Worked on an **internal admin platform** used to manage customer orders, accounts, design assets, and Amazon/Zazzle listings across OliversLabels.com and its subsidiaries with Vue and .NET
- Developed an Azure Blob Viewer **controller, model, and DTOs** supporting **7 containers with 10,000+ assets** with search, pagination, and prefix filtering, reducing asset lookup time from **25s to <1s**
- Designed and implemented Amazon Listings home and editing pages with full sync/edit capability for **14,627 listings**, integrating **Amazon's Listing API** with the Oliver's Labels database and supporting **live updates via SignalR**
- Implemented and tested a new **responsive site-wide theme** with consistent branding and navigation across **47+ pages**
- Built Catalog **management pages and controllers** for internal product **(~2,000)**, package **(~5,000)**, and design **(~50)** codes, and with product and design categories **(~100)**
- Built pages and **API endpoints** for account and fundraiser editing, and developed a promo code/gift card management interface handling **2.1 million codes**
- Created a live SVG asset previewer and editor, rendering vector graphics from the Oliver's Labels database
- Refactored the shipping label **controller** and **mappings** in **.**NET to use explicitly set package dimensions and metadata for shipping rate calculations and purchasing shipping labels
- Participated in **weekly team meetings** to track progress, clarify tasks, and align development priorities

Projects

SavePoint (Website) | *Vue 3, Nuxt, Tailwind, TypeScript, .NET, Figma, MSSQL* Apr. 2025 – Present

- Developing a **full-stack** game management platform using Nuxt/Vue + ASP.NET Core/MS SQL to allow gamers to track their collection and enable businesses to manage and digitize their inventory
- Created **5 controllers** with CRUD operations, **12+ models**, **17+ DTOs**, and **10+ AutoMapper resolvers**, ensuring maintainable and scalable data flow with a MS SQL database with **400+ games**.
- Integrated the **IGDB API** using **RestSharp** (.NET), and PriceCharting.com and eBay **web scrapers** using **Axios** (JS) to retrieve detailed game data including current and historical game pricing
- Built responsive Home, Details, and Search pages and **12+ reusable Vue components** styled with Tailwind CSS, ensuring **responsive mobile-friendly design**
- Created **5+ pages** and **10+ components** in Figma including Home, Products, and Inventory pages, using a glassmorphic theme to incorporate consistent and modern designs
- Securely connected the frontend and backend using **CORS**

Koyomi (macOS, iOS) | *Swift, Python, Git, Xcode, Firebase, SwiftUI, Figma, Ollama* Oct. 2024 – Mar. 2025

- Developed a **native iOS anime tracker app** to allow users to efficiently track anime episode release schedules
- Migrated data management from a local JSON file to **Firebase** to enable real-time updates and easy retrieval of data for a database of **980+ animes**
- Improved database querying and updating by **93.9%** using **Tasks and async functions** in Swift
- Created **5+ pages** in Figma using a glassmorphic theme to incorporate modern and user-friendly designs
- Improved data retrieval of **900+ shows** from TVDB and AniList **APIs** by **93%** using **asyncio and async functions** in Python
- Optimized writes to database by **94.88%** by implementing batch writes
- Implemented a **local AI model** (Mistral) using Ollama to create AI recaps for shows

Education

University of Ottawa Ottawa, ON
Bachelor's in Software Engineering (CO-OP), 2nd Year *Expected Graduation: Dec. 2028*
GPA: 3.9/4.0 ––– Available for 4 or 16 months beginning January 2026
